New Course Offering for Fall 2016:

Scientific Communication

BIOL 701/EVRN 720 (Topics in: Scientific Communication)
Instructor: Dr. Amy Burgin (burginam@ku.edu)
3 credits, Wed. 6-9PM, 3012 Haworth Hall

Scientific Communication will analyze communication for the art that it is, thereby improving your own reading, writing and speaking skills. This course is designed to give upper-level undergraduates and graduate students tools for communicating their work clearly with multiple audiences via different modes of communication. Participants should have an on-going or completed research project. Reading, reflection and discussion are the core activities of this class. Topics covered include: defining a narrative, writing scientific papers, honing a message for multiple audiences, and developing oral presentations. A draft syllabus is available on request.

Required Reading Texts:
